Dr. Rajendra Gode College of Pharmacy, Malkapur

Criterion II- Teaching Learning and Evaluation

2.6.1 Programme Educational Objectives (PEOs), Programme Outcomes (POs), Course Outcomes (Cos)

PROGRAM EDUCATIONAL OBJECTIVES (PEOs)

PEO_01:

To provide student graduates with solid foundation in Pharmacy knowledge which includes - possessing basic knowledge and comprehensive understanding of Profession of Pharmacy.

PEO_02:

To prepare student graduates for a successful career in Pharmacy Profession with effective planning skills, problem analyzing skills, leadership skills, research skills, presentation skills, communication skills and professional ethics.

PEO_03:

To train student graduates in learning, selecting, and applying appropriate methods, procedures and resources of modern tools in Pharmacy Profession.

PEO_04:

To inculcate in student graduates, ability to gain multidisciplinary knowledge through innovative projects, industrial training, industrial visits, visiting research institutions, health care communities, health promoters, employees and employers.

PEO_05:

To develop professional identity, understanding need of life-long learning, sustainable development in student graduates.

PROGRAM OUTCOMES (POs)

1. Pharmacy Knowledge: Possess knowledge and comprehension of the core and basic knowledge associated with the profession of pharmacy, including biomedical sciences; pharmaceutical sciences; behavioural, social, and administrative pharmacy sciences; and manufacturing practices.

2. Planning Abilities: Demonstrate effective planning abilities including time management, resource management, delegation skills and organizational skills. Develop and implement plans and organize work to meet deadlines.

3. Problem Analysis: Utilize the principles of scientific enquiry, thinking analytically, clearly and critically, while solving problems and making decisions during daily practice. Find, analyze, evaluate and apply information systematically and shall make defensible decisions.

4. Modern tool Usage: Learn, select, and apply appropriate methods and procedures, resources, and modern pharmacy-related computing tools with an understanding of the limitations.

5. Leadership skills: Understand and consider the human reaction to change, motivation issues, leadership and team-building when planning changes required for fulfilment of practice, professional and societal responsibilities. Assume participatory roles as responsible citizens or leadership roles when appropriate to facilitate improvement in health and wellbeing.

6. Professional Identity: Understand, analyze and communicate the value of their professional roles in society (e.g. health care professionals, promoters of health, educators, managers, employers, employees).

7. Pharmaceutical Ethics: Honour personal values and apply ethical principles in professional and social contexts. Demonstrate behaviour that recognizes cultural and personal variability in values, communication and lifestyles. Use ethical frameworks; apply ethical principles while making decisions and take responsibility for the outcomes associated with the decisions.

8. Communication: Communicate effectively with the pharmacy community and with society at large, such as, being able to comprehend and write effective reports, make effective presentations and documentation, and give and receive clear instructions.

9. The Pharmacist and Society: Apply reasoning informed by the contextual knowledge to assess societal, health, safety and legal issues and the consequent responsibilities relevant to the professional pharmacy practice.

10. Environment and sustainability: Understand the impact of the professional pharmacy solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.

11. Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change. Self-assess and use feedback effectively from others to identify learning needs and to satisfy these needs on an ongoing basis.

COURSE OUTCOMES

B. Pharmacy I Year

| Sr. | Course Name | CO | Course Outcomes |
|-----|---|-----|---|
| No. | with Code | No. | |
| | | | SEMESTER I |
| | | CO1 | Understand basic knowledge about cell and tissue of the body. |
| | | CO2 | Understand anatomy and physiology of skin. |
| | Human | CO3 | Understand how our body skeleton is made and its complexity with physiology. |
| 01 | Anatomy and Physiology-I (BP101T) | CO4 | Understand components of haemopoietic system and its significance in body and its relation to diseases |
| | | CO5 | Get concept related to peripheral nervous system and its functioning |
| | | CO6 | Understand anatomy and physiology of cardiovascular system and get aware about diseases occurs in it. |
| | | CO1 | Students would have studied about the gross morphology, structure and functions of cell, skeletal, muscular, cardiovascular system of the human body. |
| | | CO2 | They would have understood the various homeostatic mechanisms and their imbalances. |
| 0.2 | Human Anatomy and Physiology-I (BP107 P) | CO3 | Students would able to identify the different types of bones in human body. |
| 02 | | CO4 | Students would be able to identify the various tissues of different systems of human body. |
| | | CO5 | Students would learn about the various experimental techniques related to physiology. |
| | | CO6 | They would have learnt various techniques like blood group determination, blood pressure measurement, and blood cells counting |
| | | CO1 | Understand knowledge about basic definitions of analysis, sources of impurities in medicines, errors occur during analytical work. |
| | | CO2 | Understand the concept of titration and also get knowledge related to acid, bases, buffers and PH Scale. |
| 03 | Pharmaceutical Analysis I (BP102T) | CO3 | Understand the concept of solubility, precipitation and complex formation during titration and role of various indicator. |
| 05 | | CO4 | Understand the purity of analytic along with conc and composition of substance by the concept of gravimetric and assay method. |
| | | CO5 | Able to think regarding chemical process occurs during diazotization and redox titration. |
| | | CO6 | Understand the electric and chemical properties of substance by knowing the concept of conductivity, polarography, and potentiometry. |

| | Pharmaceutical Analysis I | CO1 | Understand knowledge about basic definitions of analysis, sources of impurities in medicines, errors occur during analytical work. |
|----|--------------------------------|-----|--|
| | | CO2 | Understand the concept of titration and also get knowledge related to acid, bases, buffers and pH Scale. |
| 04 | | CO3 | Understand the concept of solubility, precipitation and complex formation during titration and role of various indicator. |
| 04 | (BP108 P) | CO4 | Understand the purity of analytic along with conc. and composition of substance by the concept of gravimetric and assay method. |
| | | CO5 | Able to think regarding chemical process occurs during diazotization and redox titration. |
| | | CO6 | Understand the electric and chemical properties of substance by knowing the concept of conductivity, polarography, and potentiometric. |
| | | CO1 | Know the history of profession of pharmacy. |
| | | CO2 | Understand the basics of different dosage forms, pharmaceutical incompatibilities and pharmaceutical calculations. |
| 05 | Pharmaceutics- I (BP103T) | CO3 | Understand the professional way of handling the prescription. |
| | | CO4 | Preparation of various conventional dosage forms. |
| | | CO5 | Understand the details about suppository dosage form and Different types of pharmaceutical incompatibilities. |
| | | C06 | Understand the different semisolid dosage form. |
| | | CO1 | Understand the method of preparation of different Powders. |
| | | CO2 | Understand the method of preparation of Granules. |
| | | CO3 | Understand the method of preparation of different Monophasic liquid dosage form. |
| 06 | Pharmaceutics- I (BP1096 P) | CO4 | Understand the method of preparation of different Bi- Phasic liquid dosage form. |
| | | CO5 | Understand the method of preparation of different Semisolid Preparations like ointment gels. |
| | | CO6 | Understand the method of preparation of different |
| | | | Suppository. Explain the sources of impurities and methods to determine |
| | | CO1 | the impurities in inorganic pharmaceuticals. |
| | | CO2 | Explain the method of preparation, assay, properties, and medicinal uses of acids, bases, buffers, extra and intracellular. |
| 07 | Pharmaceutical Inorganic | CO3 | Explain the method of preparation, assay, properties, and medicinal uses of dental. |
| | Chemistry (BP104T) | CO4 | Explain the method of preparation, assay, properties, and medicinal uses of acidifiers, antacids and cathartics. |
| | _ | CO5 | Explain the method of preparation, assay, properties, and medicinal uses of antimicrobials. |
| | | CO6 | Explain the method of preparation, assay, properties, and medicinal uses of expectorants, emetics and haematinics. |

| | | | Understand mustically have any detect and control |
|----|----------------------|-----|--|
| | | CO1 | Understand practically how can detect and control pharmaceutical impurities. |
| | | | Able to prepare and identify the inorganic pharmaceuticals |
| | | CO2 | with predefined procedures. |
| | Pharmaceutical | | Able to assemble the apparatus and equipment necessary for |
| | Inorganic | CO3 | the practical. |
| 08 | Chemistry | | Understand the safety procedures for the handling of |
| | (BP110 P) | CO4 | hazardous chemicals by using protective tools. |
| | (/ | 005 | Able to correlate the theoretical and practical knowledge |
| | | CO5 | through lab work. |
| | | 000 | Understand the importance of inorganic pharmaceuticals in |
| | | CO6 | preventing and curing the disease. |
| | | | Understand the behavioural needs for a pharmacist to |
| | | CO1 | function effectively in the areas of pharmaceutical |
| | a | | operations. |
| 00 | Communication | CO2 | Communicate effectively (verbal and non-verbal). |
| 09 | Skills | CO3 | Effectively manage the team as team player. |
| | (BP105T) | CO4 | Develop interview skills. |
| | | CO5 | Develop leadership qualities and essentials. |
| | | CO6 | Developed good communication skills. |
| | | 001 | Know the classification and silent feature of five kingdom |
| | | CO1 | of life. |
| | | CO2 | Understand the basic component of anatomy and |
| | Damadial | | physiology of plants. |
| 10 | Remedial | CO3 | Understand the basic components of anatomy and |
| 10 | Biology (BP106TP) | 05 | physiology of animal with special reference to human. |
| | (D F1001F) | CO4 | Understand the essential minerals with nitrogen cycle. |
| | | CO5 | Understand the different process followed in plants like |
| | | COS | photosynthesis and glycolysis. |
| | | CO6 | Understand cell and different cell organelles. |
| | | CO1 | Students shall be able to understand the role of |
| | | COI | mathematics in pharmacy. |
| | | | Students shall be able to relate the mathematical tools in |
| | | CO2 | the wide professional views and solve problems of |
| | | | trigonometry, calculus and matrices. |
| 11 | Remedial | CO3 | Students shall be able to solve the different types of |
| | Mathematics | 005 | problems by applying theory. |
| | (BP107TT) | | Students shall be able to adopt both conventional and |
| | | CO4 | creative techniques to the solutions of mathematical |
| | | | problems. |
| | | CO5 | Students shall be able to apply the range of techniques. |
| | | CO6 | Effectively to solve problems including theory deduction, |
| | | 000 | approximation and simulation. |

| Sr. No. | Course Name with Code | CO No. | Course Outcomes |
|------------|------------------------------|-----------|---|
| | | | SEMESTER II |
| | | CO1 | Understand morphology, anatomy and functioning of nervous system of the body. |
| | | CO2 | Determine importance of digestive system in body and understands how digestion occurs. |
| | Human | CO3 | Understand how human need of oxygen fulfills and |
| 12 | Anatomy and Physiology-II | CO4 | by which mechanism it happened. Know about the significance of urinary system in |
| 12 | (BP201T) | | body and understands how it works. Gain knowledge about hormones, its origin and their |
| | | CO5 | importance in controlling various functions of the body. |
| | | CO6 | Acquire knowledge about anatomy and physiology of reproductive systems of both sexes and understand how reproduction occurs. |
| | Human | CO1 | Explain anatomy and physiology different systems include integumentary, sense organs, nervous, endocrine, digestive, respiratory, cardiovascular systems, urinary and reproductive using specimen, |
| | | CO2 | models, etc. Demonstrate the general neurological examination and function of olfactory nerve, positive and negative feedback mechanism. |
| 13 | Anatomy and Physiology-II | CO3 | Describe to examine the different types of taste, visual acuity and reflex activity |
| | BP207P) | CO4 | Expertise to recording of body temperature basal mass index and family planning devices and pregnancy diagnosis test. |
| | | CO5 | Gain knowledge about tidal volume and vital capacity demonstration and calculation. |
| | | CO6 | Acquire knowledge about Demonstration of total blood count by cell analyzer and Permanent slides of vital organs and gonads. |
| | | CO1 | Understand the basics and scope of organic chemistry in pharmacy |
| | | CO2 | Able to write the structure, IUPAC naming of organic compounds. |
| | Pharmaceutical | CO3 | Understand types of chemical compounds, types of isomerism of the organic compound. |
| | Organic Chamistry I | CO4 | Know about the orientation |
| | Chemistry I (BP202T) | CO5 | Gain knowledge about hormones, its origin and their importance in controlling various functions of the body. |
| | | CO6 | Acquire knowledge about anatomy and physiology of reproductive systems of both sexes and understand how reproduction occurs. |
| 15 | | CO1 | Understand the scope of Biochemistry in pharmacy |

| [| | 1 | |
|----|------------------|------|---|
| | | CO2 | Understand role of biochemical processes and cell metabolism. |
| | | CO3 | Understand general metabolism process of proteins, lipids, carbohydrates. |
| | | | Understand basics like chemistry, function, |
| | D: 1 | CO4 | classification, biological importance, qualitative tests |
| | Biochemistry | | & applications of various biomolecules. |
| | (BP203T) | | Understand the enzyme structures, their functions, |
| | | CO5 | mechanism for enzymatic activity and applications of |
| | | | enzymes. |
| | | | Understand the genetic organization of mammalian |
| | | CO6 | genome and functions of DNA in the synthesis of |
| | | 001 | RNAs and proteins. |
| | | CO1 | Understand the scope of Biochemistry in pharmacy. |
| | | CO2 | Understand the qualitative test for Biomolecules. |
| | | CO3 | Understand the scope of determination of glucose, |
| | | | total cholesterol, and creatinine in the blood. Understand the enzyme structures, their functions, |
| 16 | Biochemistry | CO4 | mechanism for enzymatic activity and applications of |
| 10 | (BP209 P) | 0.04 | enzymes. |
| | | | Understand the Quantitative analysis of reducing |
| | | CO5 | sugar and protein. |
| | | COC | Understand the preparation of various Physiological |
| | | CO6 | buffers and their application. |
| | | | Distinguish environmental factors, physical, |
| | | CO1 | psychosocial, cognitive and various stressors that |
| | | | affect disease and conditions. |
| | | CO2 | Name the signs and symptoms of the diseases. |
| | D 1 1 1 1 | CO3 | Describe the mechanisms the body uses to react to |
| 17 | Pathophysiology | | stressors and pathogens. |
| | (BP204T) | CO4 | Demonstrate a basic understanding of the concepts, |
| | | | principles and elements of disease. Identify the risk factors, etiology, pathophysiology, |
| | | CO5 | clinical manifestations, and diagnostic tests related to |
| | | | diseases and conditions. |
| | | CO6 | Mention the complications of the diseases. |
| | | CO1 | Learn about the binary system and its conversion. |
| | | CO2 | Learn about the binary system and its conversion. |
| | | | Know the various applications of databases in |
| | Computer | CO3 | pharmacy. |
| 10 | Application in | CO4 | Know the various types of applications of computer |
| | Pharmacy | | in pharmacy. |
| | (BP205T) | CO5 | Studies about various departments like hospital |
| | | | pharmacy, clinical pharmacy, patient monitoring, |
| | | CO4 | diagnostic system. |
| | | CO6 | Design and develop solutions to analyse pharmaceutical problems using computers. |
| 19 | Computer | CO1 | Learn about HTML web page. |
| 17 | Application in | CO1 | Create database using MS Access. |
| | Pharmacy | CO3 | Learn about create, delete, modify database. |
| L | ··· J | 2.20 | |

| | | ~~ · | |
|----|---------------|------|---|
| | (BP210P) | CO4 | Learn about information retrieval of storage drug |
| | | | information using online tools. |
| | | CO5 | Able to design a form in MS access and record patient |
| | | | data. |
| | | CO6 | Able to use online software for the information of a |
| | | | drug and its adverse effects. |
| 20 | | CO1 | Know the component, multidisciplinary nature, |
| | | | Importance, scope of environmental studies and |
| | | | methods to create public awareness. |
| | | CO2 | Understand the Natural resources, their types and |
| | | | associated problem (forest, Water, minerals, food, |
| | | | energy like renewable and non-renewable, land |
| | | | resources) and role of individual in conservation of |
| | | | natural resources. |
| | Environmental | CO3 | Understand the concept of eco system, energy cycle, |
| | Sciences | 005 | food chain and food web. |
| | (BP206T) | CO4 | |
| | (DI 2001) | 04 | Understand the types, structure and function and |
| | | | conservation of grassland eco system, Desert eco |
| | | 005 | system and aquatic eco system. |
| | | CO5 | 1 / 1 |
| | | | sources, consequences and control air pollution, |
| | | | water pollution, solid pollution. |
| | | CO6 | Understand the details about Solid waste |
| | | | management, role of an individual in the prevention |
| | | | of pollution. |

B. Pharmacy II Year

| Sr. No. | Course Name with Code | CO No. | Course Outcomes |
|------------|---|-----------|--|
| | | | SEMESTER III |
| | | CO1 | Understand the scope of organic chemistry in pharmacy. |
| | | CO2 | Understand types of chemical compounds, structure, their nature, properties of organic compounds. |
| | Pharmaceutical Organic Chemistry- II(BP301T) | CO3 | Understand general synthesis process of various chemical compound. |
| 21 | | CO4 | Understand basics like chemistry, Methods of preparation, classification, synthetics importance qualitative tests & applications of various organic compounds. |
| | | CO5 | Understand the structures, their nomenclature, and mechanism of various chemical reactions of organic compounds. |
| | | CO6 | Understand the various theories proposed, principle, evaluation and significance of their study. |
| | Pharmaceutical | | To evaluate the quality of fats and oils by determining |
| 22 | Organic | CO1 | acid value, saponification value, and iodine value as per |
| | Chemistry-II | | pharmacopeia. |

| | (BP305P) | | To synthesize the various organic compounds and |
|-----|----------------|----------|--|
| | | CO2 | understands the reaction mechanism involved in the |
| | | | synthesis. |
| | | CO^{2} | Calculate the percentage yields of the products obtained |
| | | CO3 | by synthesis. |
| | | | To evaluate the synthesized compounds for elements |
| | | CO4 | detection and also able to carry out physical constant |
| | | | determination. |
| | | CO5 | Purify organic compounds using various procedures like |
| | | | recrystallization and steam distillation. |
| | | CO6 | Apply recrystallization and steam distillation methods for |
| | | | the purification of synthesized organic compounds. |
| | | CO1 | Understand various physicochemical properties of drug |
| | | | molecules in the designing the dosage forms. |
| | | CO2 | Know the phenomenon of solubility and its application. |
| | Physical | CO3 | Understand various states of matter along with their |
| 23 | Pharmaceutics- | | physical properties. |
| | (BP302T) | CO4 | Understand surface and interfacial phenomena and its application. |
| | (DI 3021) | CO5 | Know various types of complexation. |
| | | | Demonstrate use of physicochemical properties in the |
| | | CO6 | formulation development and evaluation of dosage forms. |
| | | | Determination of the solubility, Partition co- efficient of |
| | | CO1 | benzoic acid in benzene, Iodine in carbon tetrachloride |
| | | | and water. |
| | | | Determination of % composition of NaCl in a solution |
| | | CO2 | using phenol-water system by CST method. |
| | Physical | | Determination of surface tension by drop count and drop |
| 24 | Pharmaceutics- | CO3 | weight method, HLB number of a surfactant by |
| | BP306P) | | saponification method. |
| | | CO4 | Determination of Freundlich and Langmuir constants |
| | | CO5 | Determination of critical micellar concentration of |
| | | | surfactants. |
| | | CO6 | Determination of stability constant and donor acceptor |
| | | | ratio of Cupric-Glycine complex by ph titration method. |
| | | CO1 | Understand morphology, reproduction and growth, |
| | | COI | methods of identification, cultivation and preservation of various microorganisms and their roles in pharmacy. |
| | | CO2 | Understand the importance and implementation of |
| | | 002 | sterilization and disinfection in pharmaceutical |
| | | | processing and industry. |
| ~ - | Pharmaceutical | CO3 | Learn sterility testing of pharmaceutical products and its |
| 25 | Microbiology | | significance. |
| | (BP303T | CO4 | Understand the microbial spoilage, its causes, types, |
| | | | assessment; preservation of products. |
| | | CO5 | Carry out microbiological standardization of |
| | | | Pharmaceuticals. |
| | | CO6 | Understand the cell culture technology and its |
| | | | applications in pharmaceutical industries. |
| 26 | Pharmaceutical | CO1 | Understand principles and working of different |
| | Microbiology | | equipments and instruments e.g. B.O.D. incubator, |

| | (BP307P) | | laminar flow, aseptic hood, autoclave, hot air sterilizer, |
|----|--|-----|---|
| | | | deep freezer, refrigerator, microscopes used in experimental microbiology. |
| | | CO2 | Perform Sterilization of glassware, preparation and sterilization of nutrient media. |
| | | CO3 | Isolate and observe pure culture of micro-organisms obtained by multiple streak plate techniques and other techniques. |
| | | CO4 | Understand and perform staining methods- Simple, Gram's, Negative staining etc for identification of microorganisms. |
| | | CO5 | Perform and interpret microbiological assay of antibiotics by cup plate method and other methods. |
| | | CO6 | Perform sterility testing of pharmaceuticals and interpret the results. |
| | | CO1 | Know about various unit process and unit operation in pharmaceutical industries |
| | Pharmaceutical Engineering (BP304T | CO2 | Understand about different process involved in manufacturing of dosage form (heat transfer, flow nature of fluid). |
| | | CO3 | Know about different basic principle and laws, theory of various unit operation. |
| 27 | | CO4 | Understand about the principle construction, working, uses advantages and disadvantages of various equipment used in pharmaceutical industries. |
| | | CO5 | .Understand the plant layout and material handling system in pharmaceutical industries. |
| | | CO6 | Know about concept of corrosion and their preventive measures. |
| | | CO1 | Know about application of pharmaceutical engineering in pharmaceutical industries. |
| | Pharmaceutical Engineering | CO2 | Know about demonstration of practical related to crystallization. |
| 28 | | CO3 | Understand about relationship between various factor effecting on different unit operation like evaporation, filtration. |
| | (BP308P) | CO4 | Understand and demonstrate practical on the basis of drying, size separation, and distillation. |
| | | CO5 | Understand the practical on material handling system in pharmaceutical industries like measurement of flow. |
| | | CO6 | Demonstrate practical about various equipment used in pharmaceutical industries. |

| Sr. No | Course Name with Code | CO No. | Course Outcomes |
|-----------|--------------------------|------------|---|
| | with Code | 110. | Course Outcomes |
| | | | SEMESTER IV |
| | | CO1 | Understand about basic concepts isomerism. |
| | | | Understand about structural, geometrical isomerism, |
| | | CO2 | conformational isomerism, optical activity, nomenclature |
| | | 000 | of organic compounds. |
| | Pharmaceutical | CO3 | Understand about isomerism in alkane's and cycloalkanes |
| 29 | Organic | CO4 | Understand the concept of heterocyclic compounds their nomenclature, methods of preparation, reaction |
| 29 | Chemistry-III | C04 | nomenclature, methods of preparation, reaction mechanisms of various types and medicinal uses. |
| | (BP401T) | | Understand the concept of heterocyclic chemistry and its |
| | | CO5 | application in medicinal chemistry. |
| | | | Understand about different types of chemical agents and |
| | | CO6 | important synthetic reactions, with their mechanisms of |
| | | | different types of reactions. |
| | | | Understand basic knowledge about the history & |
| | | CO1 | development medicinal chemistry and physicochemical |
| | | | properties and drug metabolism. |
| | | | Understand basic knowledge about the structure, |
| | | CO2 | chemistry and therapeutic value of drug acting on |
| | Medicinal | | autonomous nervous system. |
| | | CO3 | Understand the chemistry of drugs with respect to their |
| | | | pharmacological activity of par sympathomimetic agent. |
| 20 | | CO4 | Understand the chemistry of drugs with respect to their |
| 30 | Chemistry-I | | pharmacological activity and Structural Activity |
| | (BP402T) | | Relationship (SAR) of drug acting on central nervous |
| | | CO5 | system. Understand the chemistry of drugs with respect to their |
| | | | pharmacological activity, drug metabolic pathways of |
| | | | General anaesthetics agent. |
| | | | Understand the Structural Activity Relationship (SAR) of |
| | | COC | drug, metabolic pathways, adverse effect and therapeutic |
| | | CO6 | value and chemical synthesis of Narcotic and non- |
| | | | narcotic analgesics. |
| | | CO1 | Preparation of drugs/ intermediates e.g. 1,3-pyrazole, 1,3- |
| | | | oxazole, Benz imidazole & Benztriazole. |
| | | 000 | Preparation of drugs/ intermediates e.g.2, 3- diphenyl |
| | | CO2 | quinoxaline, Benzocaine, Phenytoin, Phenothiazine & |
| 21 | Medicinal | 002 | Barbiturate. |
| 31 | Chemistry-I | CO3 | Perform assay of drugs like Chlorpromazine, |
| | (BP406P) | CO4 | Phenobarbital. Perform assay of drugs like. Atropine, Ibuprofen. |
| | | C04 C05 | Perform assay of drugs like. Aspirin, Furosemide. |
| | | CO5 | Understand Determination of Partition coefficient for |
| | | 000 | drugs. |
| | | ~~ . | Understand various physicochemical properties of drug |
| 32 | | CO1 | molecules in the designing the dosage forms. |
| L | 1 | | |

| | | | Understand various types of dispersions and their uses in |
|----|-------------------------------|------------|---|
| | | CO2 | pharmacy. |
| | | CO3 | Know the types of flow of liquid and their application. |
| | | | Understand various methods used to measure particle size |
| | Physical | CO4 | of powders. |
| | Pharmaceutics- | | Know the principles of chemical kinetics & to use them |
| | II (BP403T) | CO5 | for stability testing and determination of expiry date of |
| | | | formulations. |
| | | CO6 | Demonstrate use of physicochemical properties in the |
| | | 000 | formulation development and evaluation of dosage forms. |
| | | | Determination of particle size, particle size distribution |
| | | CO1 | using sieving method, Microscopic method for the given |
| | | | samples. |
| | | CO2 | Determination of bulk density, true density, porosity and |
| | D1 1 | | angle of repose for the powder samples. |
| 33 | Physical Dearma continu | CO3 | Determination of viscosity of liquids using Ostwald's viscometer. |
| 33 | Pharmaceutics- II (BP407P) | | Determination of sedimentation volume with effect of |
| | п (Бі 4071) | CO4 | different concentration of single suspending agents. |
| | | | Determination of sedimentation volume with effect of |
| | | CO5 | different suspending agent. |
| | | 001 | Determination of reaction rate constant first order, Second |
| | | CO6 | order. |
| | | CO1 | Understand basic knowledge of pharmacokinetics. |
| | | CO2 | Understand the pharmacodynamics and drug receptor |
| | | 02 | interaction. |
| | | CO3 | Understand drug acting on peripheral nervous system & |
| 34 | Pharmacology- | | function. |
| | I (BP404T) | CO4 | Understand drug acting on central nervous system and |
| | | | mechanism of action. |
| | | CO5 | Learning psycho pharmacological drugs & mechanism of |
| | | CO6 | action. Understand general anesthetics and pre-anaesthetics. |
| | | C00 | Handling and restraining of various laboratory animals. |
| | | CO1 CO2 | To understand the route of drug administration. |
| | | | To understand the judelines for maintenance of animals, |
| | | CO3 | various equipment and apparatus. |
| 25 | Pharmacology- | COA | To observe the effect of drug on animals by simulated |
| 35 | I (BP408P) | CO4 | experiments. |
| | | CO5 | To appreciate correlation of pharmacology with other bio |
| | | 005 | medical sciences. |
| | | CO6 | To appreciate correlation of pharmacology with other bio |
| | | | medical sciences. |
| | | CO1 | Understand sources of drug from various natural sources. |
| | Dhammana | CO2 | Understand about plant taxonomy and cultivation, |
| | Pharmcogonosy and | | Collection, Processing, and storage of crude drugs. Understand about plant taxonomy and cultivation, |
| 36 | Phytochemistry | CO3 | Collection, Processing, and storage of crude drugs. |
| | –I (BP405T) | CO4 | Know the evaluation technique of herbal drugs. |
| | | | Understand carry out the microscopic and morphological |
| | | CO5 | evaluation of crude drugs. |
| L | 1 | | - 0 |

| | | CO6 | Understand the plant tissue culture. |
|----|---|-----|--|
| | Pharmacognos y and Phytochemistr y-I (BP409P) | CO1 | Understand principles and working of different equipments and instruments e.g. B.O.D. incubator, laminar flow, aseptic hood, autoclave, hot air sterilizer, deep freezer, refrigerator, microscopes used in experimental microbiology. |
| | | CO2 | Perform Sterilization of glassware, preparation and sterilization of nutrient media. |
| 37 | | CO3 | Isolate and observe pure culture of micro-organisms obtained by multiple streak plate techniques and other techniques. |
| | | CO4 | Understand and perform staining methods- Simple, Gram's, Negative staining etc for identification of microorganisms. |
| | | CO5 | Perform and interpret microbiological assay of antibiotics by cup plate method and other methods. |
| | | CO6 | Perform sterility testing of pharmaceuticals and interpret the results. |

B. Pharmacy III Year

| Sr. No. | Course Name with Code | CO No. | Course Outcomes |
|------------|--------------------------------------|-----------|---|
| | | | SEMESTER V |
| | | CO1 | Understand the chemistry of drugs with respect to their pharmacological activity. |
| | | CO2 | Understand the drug metabolic pathways, adverse effect and therapeutic value of Drugs. |
| 38 | Medicinal Chemistry-II | CO3 | Know the Structural Activity Relationship of different class of drugs. |
| | (BP501T) | CO4 | Study the chemical synthesis of selected drugs. |
| | | CO5 | Depict synthetic routes of important medicinal agents. |
| | | CO6 | Importance of physicochemical properties and metabolism of drugs. |
| | Industrial Pharmacy-I (BP502T) | CO1 | Importance of preformulation of drugs, excipients and their role in formulation design. |
| | | CO2 | Knowledge on tablet and liquid dosage forms and their processing problem and QC checking. |
| 39 | | CO3 | Knowledge on capsules production and pellets with QC tests. |
| | | CO4 | Knowledge on sterile preparation and their QC evaluation. |
| | | CO5 | Knowledge on formulating various cosmetic products. |
| | | CO6 | Knowledge on different types of packaging material. |

| | 1 | | |
|-----|---------------------------------------|-------------|---|
| | | GOA | Carry out assessment of physicochemical properties of |
| | | CO1 | drugs as a tool in the optimization of solid and liquid |
| | | | dosage forms. |
| | | CO2 | Formulate and prepare tablets, capsules and liquid orals |
| | | | using established procedures and technology. |
| | Industrial | CO3 | Formulate and prepare different types of parenteral and |
| 40 | Pharmacy I | | ophthalmic dosage form. |
| 40 | (BP506P) | CO4 | Select ingredients and formulate cosmetics such as |
| | (DI 5001) | | lipsticks, shampoos, cold cream and vanishing cream, |
| | | | tooth pastes, hair dyes and sunscreens. |
| | | CO5 | Identify containers, closures, valves and propellants for |
| | | | different types of aerosol systems. |
| | | CO6 | Select and evaluate appropriate packaging materials for |
| | | | various pharmaceutical dosage forms. |
| | | CO1 | Explain the pharmacology of drug acting on |
| | | COI | cardiovascular system. |
| | | CO2 | Discuss the drug acting on urinary system. |
| | | CO 2 | Explain the pharmacology of drugs acting on endocrine |
| 4.1 | Pharmacology | CO3 | systems. |
| 41 | II (BP503T) | CO4 | Recognize adverse drug reactions and drug interactions. |
| | | | Describe the principles, applications and types of |
| | | CO5 | bioassay. |
| | | a c c | Discuss drug mechanisms and their relevance in the |
| | | CO6 | treatment of diseases. |
| | | | Choose physiological salt solutions for isolated tissue |
| | | CO1 | preparations. |
| | | | They would have observed the effect of drugs on animals |
| | | CO2 | by simulated experiments. |
| | Pharmacology | | They would have observed the various receptor actions |
| 42 | II (BP507P) | CO3 | using isolated tissue preparation. |
| | | | Interpret the effect of spasmogens and spamolytics on |
| | | CO4 | suitable tissue preparations. |
| | | CO5 | Using bioassay methods. |
| | | C06 | Determine pd2 value. |
| | | | Understand metabolic pathway and their biogenetic |
| | | CO1 | studies. |
| | | | Understand pharmacognostic studies of secondary |
| | | CO2 | metabolites like alkaloids, glycosides, tannin, volatile |
| | Pharmacognosy | 001 | oil etc. |
| 43 | and | | Understand isolation, identification and analysis method |
| 15 | Phytochemistry- | CO3 | of phyto constituents. |
| | II (BP504T) | | Understand industrial production, their estimation and |
| | | CO4 | utilization of phyto constituents. |
| | | CO5 | Understand modern techniques of extraction. |
| | | CO6 | Know latest technique for analysis of phyto constituents. |
| | | | Understand the morphological, microscopically, |
| | Pharmacognosy | CO1 | histological and powder characteristics of crude drugs. |
| 44 | and Phytochemistry- II (BP508P) | CO2 | Learn about extraction and detection of crude drug. |
| ++ | | CO2 CO3 | Know the isolation of phyto-constituents. |
| | | CO3 | Understand chromatographic techniques. |
| | | 004 | onderstand enformatographic techniques. |

| | | CO5 | Understand hydro distillation method for isolation of oil |
|----|---|-----|---|
| | | COS | from crude drug. |
| | | CO6 | Understand analysis of crude drug by chemical test. |
| | | CO1 | Understand legal definitions of the drug and cosmetic act, 1940 and its rule 1945, schedule, regulatory authorities and agencies governing the manufacture, sale, and import of pharmaceuticals. |
| | | | |
| | 45 Pharmaceutical Jurisprudence (BP505T) CO CO | CO2 | Students shall be able to access the standard of educational regulations, composition, and functions of |
| | | | various regulatory authorities, committees, and agencies. |
| 45 | | CO3 | To understand various act and rules regulating profession and practice of pharmacy in India. |
| | | CO4 | To understand pharmaceutical legislation, history, |
| | | | evolution, and growth of the pharmaceutical industry |
| | | 005 | 5Students shall be able to implement the code of ethics |
| | | COS | in their professional activities in pharmacy. |
| | | CO6 | Understand Intellectual property rights, the procedure |
| | | 000 | for patent application, and regulatory authorities. |

| Sr. No. | CourseNamewith Code | CO No. | Course Outcomes |
|------------|--|-----------|--|
| | | | SEMESTER VI |
| | | CO1 | Understand the importance of drug design and different techniques of drug design. |
| | Medicinal | CO2 | Understand the chemistry of drugs with respect to their biological activity. |
| 46 | Chemistry-III | CO3 | Know metabolism, adverse effects and therapeutic values of drugs. |
| | (BP601T) | CO4 | Know the importance of SAR of drugs. |
| | | CO5 | Know the Drug design. |
| | | CO6 | Effect of structural modification of drug in disease condition. |
| | Medicinal Chemistry-III (BP607P) | CO1 | Upon completion of the course student shall be able to: Know different grade chemicals, apparatus used in synthetic laboratory and basic unit operations carried out in synthetic laboratory. |
| 47 | | CO2 | Carry out synthesis of chemical compounds based on simple chemical reactions. |
| 4/ | | CO3 | Perform assays of drugs and determination of some physicochemical properties. |
| | | CO4 | Know the use of microwave ovens for synthesis of chemical compounds. |
| | | CO5 | Know different softwares used for drawing structures of chemical compounds. |
| 48 | Pharmacology III (BP602T) | CO1 | To appreciate correlation of pharmacology with medical sciences of respiratory and GIT. |

| | | CO2 | To comprehend various principles of toxicology as well as chrono-pharmacology. |
|----|--|-----|--|
| | | CO3 | To categorize immune pharmacology as immune- stimulants and immunosuppressant. |
| | | CO4 | To explain the chemotherapy of antibiotics. |
| | | | To understand the mechanism of drug action and its |
| | | CO5 | relevance in the treatment of different infectious |
| | | | diseases. |
| | | CO6 | To assess the chemotherapy of UTI, STDs and malignancy. |
| | | CO1 | Dose calculation in pharmacological experiments and ant allergic activity. |
| | | CO2 | Study of anti-ulcer activity of a drug and effect of drugs on gastrointestinal motility. |
| 49 | Pharmacology III | CO3 | Effect of agonist and antagonists and Estimation of serum biochemical parameters. |
| | (BP608P) | CO4 | Effect of saline purgative on frog intestine and Insulin hypoglycaemic effect in rabbit. |
| | | CO5 | Determination of acute oral toxicity (LD50). |
| | | CO6 | Determination of acute skin irritation/eye irritation and |
| | | | Biostatistics methods in experimental pharmacology. |
| | Herbal Drug 50 Technology (BP603T) | CO1 | Understand raw material as a source of herbal drug from cultivation to the herbal drug product. |
| | | CO2 | Understand Indian System of Medicine And preparation and standardization of ayurvedic formulation. |
| | | CO3 | Understand herbal cosmetics, natural sweeteners and neutraceuticals. |
| 50 | | CO4 | Understand evaluation of drug , patenting and regulatory issues |
| | | CO5 | Understand herbal drug industry and GMP. |
| | | CO6 | Know the WHO and ICH guidelines for evaluation of herbal drugs. Understand the basic concepts in Biopharmaceutics, Absorption, Distribution, Metabolism, Excretion; and factors affecting these processes. |
| | | CO1 | Understand preliminary phytochemical screening of |
| | | | crude drugs. |
| | | CO2 | Understand evaluation of herbal excipients |
| 51 | Herbal Drug | CO3 | Understand preparation and standardization of herbal formulation as per Pharmacopoeia requirement. |
| | Technology (BP609P) | CO4 | Understand monograph analysis of herbal drug from pharmacopeia. |
| | | CO5 | Understand preparation and standardization of herbal cosmetics as per pharmacopeia requirement. |
| | | CO6 | Understand Aldehyde content, Phenol content and total alkaloid. |
| 52 | Biopharmaceutics and | CO1 | Understand the basic concepts in Biopharmaceutics, Absorption, Distribution, Metabolism, Excretion; and factors affecting these processes. |
| L | | | racions and ung most processes. |

| | Pharmacokinetics | | Basics of Pharmacokinetics, use of plasma drug |
|----|---|------|--|
| | (BP604T) | | concentration-time data to calculate the |
| | (D10011) | CO2 | pharmacokinetic parameters to describe the kinetics of |
| | | 002 | drug absorption, distribution, metabolism, excretion, |
| | | | elimination. |
| | | | Understand and use the concept of pharmacokinetic |
| | | CO3 | modelling and determination of various parameters |
| | | CO4 | To understand the concepts of bioavailability and |
| | | C04 | bioequivalence of drug products and their significance. |
| | | | To understand the concept of dosage regimen, |
| | | CO5 | individualization and use of relevant aspects therein in |
| | | | product development. |
| | | | Understand various pharmacokinetic parameters, their |
| | | CO6 | significance & applications in designing and |
| | | | development of dosage forms. |
| | | CO1 | Understanding the fundamentals of biotechnology |
| | Pharmaceutical Biotechnology (BP605T) | CO2 | Understand DNA technology, vaccines and hormone |
| | | | therapies. |
| | | CO3 | Understand immune products. |
| 53 | | CO4 | Understand the use of microorganisms in |
| 55 | | | biotechnology. |
| | | CO5 | Understand the process of fermentation and blood |
| | | 0.05 | related products. |
| | | CO6 | Understand future scope of biotechnology products for |
| | | 000 | alleviating diseases. |
| | | CO1 | Understand concept of Quality, Quality control and |
| | | COI | quality assurance in pharmaceutical industries. |
| | | CO2 | Understand the responsibilities of QA and QC. |
| 54 | Quality | CO3 | Understand the GMP in pharmaceutical industry. |
| | Assurance | CO4 | Understand the scope of quality certification required |
| | Assurance (BP606T) | | in pharmaceutical industries. |
| | | CO5 | Learn and understand the importance of |
| | | | documentation. |
| | | CO6 | Understand the quality control testing and their |
| | | | importance in term of patient health. |

B. Pharmacy IV Year

| Sr. No. | Course Name with Code | CO No. | Course Outcomes |
|------------|----------------------------|-----------|--|
| | | | SEMESTER VII |
| | | CO1 | Flame photometry, a Understand basic knowledge about UV visible spectroscopy and fluorimetry and its application. |
| | | CO2 | Understand Instrumental method of analysis – IR Spectroscopy absorption spectroscopy and nepheloturbidometry. |
| 55 | Instrumental Methods of | CO3 | Understand basic knowledge about chromatography and mechanism involved in column chromatography& thin layer chromatography with its application. |
| | Analysis (BP701T) | CO4 | Understand Paper chromatography & electrophoresis with different development technique with application. |
| | | CO5 | Understand gas chromatography & High-performance liquid chromatography. |
| | | CO6 | Understand different chromatography technique its component and application -ion exchange chromatography, gel permeation Chromatography, affinity chromatography. |
| | | CO1 | Understand evaluation of absorption maxima & colorimetry of organic compound – UV- Spectroscopy & flame photometry, nephelo turbidometry. |
| | | CO2 | Understand Instrumental method of analysis – UV- Spectroscopy & Fluorimetry |
| | Instrumental Methods of | CO3 | Understand Instrumental method of analysis. |
| 56 | Analysis (BP705P) | CO4 | Understand Paper chromatography & Thin layer chromatography. |
| | (D1 /031) | CO5 | Understand gas chromatography & High-performance liquid chromatography. |
| | | CO6 | Understand different chromatography technique its component and application -Column chromatography & affinity chromatography. |
| | | CO1 | Know the process of pilot plant and scale up techniques |
| | | CO2 | Understand the process of technology transfer from lab scale to commercial Batch. |
| | Industrial | CO3 | Understand the regulatory affairs history and different roles and responsibilities of regulatory affairs professional. |
| 57 | Pharmacy II (BP702T) | CO4 | Understand the approval process and regulatory requirement for drug approval for different country. |
| | | CO5 | Understand the Quality management system TQM, QBD, OOS and various certifications like ISO, GLP, and NABL. |
| | | CO6 | Understand the Indian regulatory requirement for drug approval. |
| 58 | Pharmacy Practice | CO1 | Importance of medications and other health care products to make best use of them. |
| | (BP703T) | CO2 | Make Hospital Formulae and importance its updates. |

| - | 1 | | |
|----|--|-----|--|
| | | CO3 | Know the Hospital and it's types, specialty & functions of specific hospital. |
| | | CO4 | Duties of hospital pharmacist, community pharmacist, hospital staff & their duties like Nurses, Doctors, and Pharmacist. |
| | | CO5 | Budget & its preparation, zero budget& other types of budget also its importance to organization. |
| | | CO6 | This subject also gives idea regarding safe use of drug, toxic effect of drug, drug- drug interaction. |
| | | CO1 | To understand Controlled Drug Delivery Systems and formulation design. |
| | Novel Drug Delivery System (BP704T) | CO2 | To understand the criteria for selection of drugs and polymers for the development of Novel drug delivery systems. |
| 59 | | CO3 | To understand various approaches for development of novel drug delivery systems. |
| | | CO4 | To understand design, development and evaluation of novel approaches for transdermal, gastro retentive and naso-pulmonary formulation. |
| | | CO5 | To understand Various Targeted Drug Delivery Approaches. |
| | | CO6 | To understand organ targeted drug delivery systems |
| | | CO1 | To disseminate the advance knowledge in the field of pharmaceutical sciences. |
| | Practice School | CO2 | To gain practical experience of industrial processes and develop new experimental strategies to tackle industrial problems. |
| 60 | | CO3 | To develop intrinsic communication and presentation skills. |
| | (BP706PS) | CO4 | To develop and built team for successful execution of project task. |
| | | CO5 | To understand current requirement in industrial sector and gain maximum knowledge. |
| | | CO6 | To develop writing skills and preparation of reports. |

| Sr. No. | Course Name with Code | CO No. | Course Outcomes |
|------------|--|-----------|--|
| | | | SEMESTER VIII |
| | 51 Biostatistics and Research Methodology (BP801T) | CO1 | Learn fundamentals of Biostatistics and measure of central tendency and dispersion. |
| | | CO2 | Learn Parametric test with measurement of regression and probability. |
| | | CO3 | Compute non parametric test. |
| 61 | | CO4 | Fundamentals of research methodology and research design. |
| | | CO5 | Regression Modelling and Introduction to software used for pharmaceutical problems. |
| | | CO6 | Designing and analyzing experiments using factorial design and response surface methods. |

| | | CO1 | To review Concept of Social and health education. |
|----|--|----------|---|
| | | | To examine general principles of prevention and control |
| | | CO2 | of various viral diseases. |
| | | | To assess General principles of prevention and control |
| | Social and | CO3 | of various lifestyle related and other diseases. |
| 62 | Preventive | | To facilitate information about various National health |
| 02 | Pharmacy | CO4 | |
| | (BP802T) | | programs. |
| | | CO5 | To assess a critical way of thinking based on current |
| | | | healthcare development. |
| | | CO6 | To manage Community services in rural, urban and |
| | | | school health. |
| | | CO1 | Know the concept of marketing and Pharmaceutical |
| | | <u> </u> | marketing. |
| | Pharma | CO2 | Understand the Product decision. |
| 62 | Marketing | CO3 | Understand the Promotion. |
| 63 | Management | CO4 | Understand the Pharmaceutical marketing channels role |
| | (BP803ET) | <u> </u> | of Professional sales representative. |
| | `````````````````````````````````````` | CO5 | Understand the role of Professional sales representative. |
| | | CO6 | Understand the Pricing and Emerging concepts in |
| | | | marketing. |
| | Pharmacovigi lance | CO1 | Drug safety monitoring importance and History and |
| | | | development of Pharmacovigilance. |
| | | CO2 | National and international scenario of |
| | | | Pharmacovigilance. |
| | | CO3 | Detection of new adverse drug reactions and their |
| 64 | | | assessment. |
| | (BP805ET) | CO4 | International standards for classification of diseases and |
| | | | drugs. |
| | | COF | Pharmacovigilance Program of India (PVPI) |
| | | CO5 | requirement for ADR reporting in India 11, ICH |
| | | CO6 | guidelines. |
| | | 000 | CIOMS requirements for ADR reporting. |
| | | CO1 | The basic fundamentals of cosmetics and Key ingredients used in cosmetics and cosmaceuticals. |
| | | | The principles of formulation and building blocks of |
| | | CO2 | skin care products. |
| | | | The role of herbs in cosmetics & Various key |
| | Cosmetic | CO3 | ingredients develop cosmetics and cosmeceuticals. |
| 65 | Science | | Knowledge on preparation and evaluation of various |
| | Science (BP809ET) | CO4 | cosmetic products. |
| | | | Scientific knowledge to develop cosmetics and |
| | | CO5 | cosmaceuticals with desired Safety, stability, and |
| | | 005 | efficacy. |
| | | | Identify various problems related to skin and understand |
| | | CO6 | Current technologies in the market. |
| L | | | |

M. Pharm. Pharmaceutics

| Sr. No. | Course Name with Code | CO No. | Course Outcomes |
|------------|---------------------------------------|-----------|---|
| | | | SEMESTER I |
| | | CO1 | Know theory, principle and applications of UV Spectroscopy, IR Spectroscopy, Flourimetry and Flame emission and atomic absorption Spectroscopy. |
| | | CO2 | Understand the theory, principle and applications of NMR Spectroscopy. |
| | Modern Pharmaceutical | CO3 | Understand the theory, principle and applications of Mass Spectroscopy. |
| 01 | Analytical Techniques (MPH101T) | CO4 | Understand the theory, principle and applications of Chromatography's like paper, TLC, Ion exchange, Column, Gas, HPLC and affinity. |
| | | CO5 | Understand the theory, principle and applications of electrophoresis and X-Ray Crystallography. |
| | | CO6 | Understand the theory, principle and applications of Immunological Assays like RIA, ELISA and Bioluminescence's. |
| | | CO1 | Knowledge on SR & CR formulations and their factors. Different polymers & their properties also personalized medicines, bio-electronic medicines, 3D Printing, tele- pharmacy. |
| | | CO2 | The principles, fundamentals, and types of Rate Controlled Drug Delivery Systems. |
| 02 | Drug Delivery System | CO3 | Knowledge on design and study on GRDDS & Mucosal DDS. |
| | (MPH102T) | CO4 | Knowledge on barriers for ocular drug delivery & its overcome methods & Knowledge on transdermal drug delivery systems. |
| | | CO5 | Knowledge on barriers, formulation & evaluation of protein drug delivery. |
| | | CO6 | Knowledge on vaccine drug delivery systems. |
| | | CO1 | Elements of preformulation and optimization techniques. |
| | Modern | CO2 | Validation of equipments, dosage forms according to regulatory agencies. |
| 03 | Pharmaceutics (MPH103T) | CO3 | Products based financial assets and Total quality management. |
| | (1/1/1/1031) | CO4 | Physical attributes of compression process and solubility. |
| | | CO5 | Effect of Consolidation on the solid substrate. |
| | | CO6 | Statistical test of designing pharmaceutical formulation. |
| | | CO1 | The concepts of innovator and generic drugs, drug development process. |
| 04 | 04 Affairs (MPH104T) | CO2 | The Regulatory guidance and guidelines for filing and approval process. |
| | | CO3 | Preparation of Dossiers and their submission to regulatory agencies in different countries. |

| | CO4 | Post approval regulatory requirements for actives and drug products. |
|--|-----|--|
| | CO5 | Submission of global documents in CTD/ eCTD formats. |
| | CO6 | Clinical trials requirements for approvals for conducting clinical trials. |

| Sr. No. | Course Name with Code | CO No. | Course Outcomes | | | |
|------------|---|------------|--|--|--|--|
| 1100 | SEMESTER II | | | | | |
| | Molecular Pharmaceutics (NT&TDDS) (MPH201T) | CO1 | Concept and biological events in drug targeting. | | | |
| | | CO2 | Knowledge on preparation and evaluation of nanoparticles | | | |
| | | | and liposomes. | | | |
| | | CO3 CO4 | Knowledge on preparation and evaluation of microspheres, | | | |
| | | | Monoclonal antibodies, niosomes, aquasomes, | | | |
| 05 | | | phytosomes and electrosomes. | | | |
| | | | Knowledge on propellants, preparation and evaluation of pulmonary and nasal aerosols. | | | |
| | | CO5 | Knowledge of Nucleic acid based therapeutic delivery | | | |
| | | | system. | | | |
| | | | Knowledge on gene therapy, antisense molecules and | | | |
| | | CO6 | aspartame as drugs of future. | | | |
| | | CO1 | The basic concepts in Biopharmaceutics and | | | |
| | | | Pharmacokinetics. | | | |
| | Advanced Biopharmaceut ics & Pharmacokinet ics (MPH202T) | CO2 CO3 | The use of raw data and derive the pharmacokinetic models | | | |
| | | | and parameters to the best to describe the process of drug | | | |
| 06 | | | absorption, distribution, metabolism and elimination. | | | |
| 06 | | | The critical evaluation of Biopharmaceutics studies | | | |
| | | CO4 | involving drug product equivalency. The design and evaluation of dosage regimens of the drugs | | | |
| | | 04 | using pharmacokinetic and biopharmaceutic parameters. | | | |
| | | CO5 | The potential clinical pharmacokinetic problems and | | | |
| | | | applications of basics of pharmacokinetics. | | | |
| | Computer Aided drug | CO1 | Historical perspective of computers in pharmaceutical | | | |
| | | | research and development of fundamental programmes for | | | |
| | | | drug development. | | | |
| | | CO2 | Understand the modeling techniques of drug disposition | | | |
| | | CO3 | and preclinical development. Optimization techniques and various software packages | | | |
| 07 | delivery | | use during formulation development. | | | |
| 07 | system | CO4 | Use of computers for market analysis and highlights on | | | |
| | (MPH203T) | | software packages offered for the same. | | | |
| | | CO5 | Use of artificial intelligence and robotics for continuous | | | |
| | | | manufacturing and product development. | | | |
| | | CO6 | Understand the computer fluid dynamics and simulation | | | |
| | | | softwares. | | | |
| 08 | Cosmetics and Cosmeceutical s (MPH204T) | CO1 | Understand key ingredients used in cosmetic and cosme | | | |
| | | | ceuticals. | | | |
| | | CO2 | Understand key building blocks for various formulation. | | | |

| CO3 | Understand current technologies in the market. |
|------|---|
| CO4 | Understand various key ingredients and basic science to |
| 04 | develop cosmetic and cosmeceuticals. |
| CO5 | Understands scientific knowledge to develop cosmetic and |
| 0.05 | cosmeceuticals with desired safety, stability and efficacy. |
| CO6 | Understand about the herbal cosmetics used for hair care, |
| 000 | skin care, oral care. |

M. Pharm. Quality Assurance

| Sr. No. | Course Name with Code | CO No. | Course Outcomes |
|------------|--|-----------|--|
| | | | SEMESTER I |
| | | CO1 | Understand the importance of quality. |
| | Quality Management System (MQA102T) | CO2 | Understand ISO management systems. |
| 01 | | CO3 | Understand tools for quality improvement. |
| 01 | | CO4 | Understand analysis of issues in quality. |
| | | CO5 | Understand quality evaluation of pharmaceuticals. |
| | | CO6 | Understand stability testing of drugs and drug substances. |
| 02 | | CO1 | Understand the cGMP aspects in pharmaceutical industry. |
| | Quality Assurance & Quality | CO2 | Understand the concept of GLP. |
| | | CO3 | Understand the importance of documentation. |
| | | CO4 | Understand ICH guidelines. |
| | Control | CO5 | Understand the scope of quality certifications applicable in |
| | (MQA103T) | | pharmaceutical industry. |
| | | CO6 | Understand the responsibility of QA and QC department. |
| | | CO1 | Understand new product development process. |
| | Product Development and Technology Transfer (MQA104T) | CO2 | Understand the necessary information to transfer |
| | | | technology from R&D to actual manufacturing by sorting |
| | | | out various information obtained during R&D. |
| | | CO3 | Elucidate necessary information to transfer technology of |
| 03 | | | existing product between various manufacturing place. |
| | | CO4 | Understand various guidelines asserted by regulatory |
| | | | agencies for transfer of technology. |
| | | CO5 | Adapt necessary preformulation skill for before the |
| | | | transfer of product. |
| | | CO6 | Understand packaging science. |
| | P'ceutical Quality Assurance Practical-I (MQA105P) | CO1 | Estimation of process capability. |
| | | CO2 | In process and finished product quality control tests for |
| | | | tablets, capsules, parenteral and semisolid dosage forms. |
| | | CO3 | Estimation of drug in pharmaceutical by using modern |
| 04 | | | analytical techniques. |
| | | CO4 | Development of Stability study protocol for |
| | | | pharmaceuticals. |
| | | CO5 | To carry out preformulation study for successful |
| | | | formulation of pharmaceuticals. |
| | | C06 | To prepare different Quality Case studies. |

| Sr. No. | Course Name with Code | CO No. | Course Outcomes | | |
|------------|---|-------------|--|--|--|
| 110. | SEMESTER II | | | | |
| | Hazards and safety Measurements (MQA201T) | CO1 | Understand about environmental problems among learners. | | |
| | | CO2 | Impart basic knowledge about environment and its allied problems. | | |
| 05 | | CO3 | Develop an attitude of concern for industry environment. | | |
| 05 | | CO4 | Ensure safety standards in pharmaceutical industry. | | |
| | | CO5 | Provide comprehensive knowledge on safety management. | | |
| | | CO6 | Idea about to clear mechanism and management in different kinds of hazard management system. | | |
| | | CO1 | Importance of patent and intellectual property rights. | | |
| | | CO2 | Knowledge of qualification aspects of various instruments. | | |
| | Pharmaceutical | CO3 | Understanding of cleaning validation of equipments employed in the manufacture of pharmaceuticals. | | |
| 06 | Validation | CO4 | Theoretical and practical basis of validation of analytical | | |
| | (MQA202T) | | method for estimation of Drugs. | | |
| | | CO5 | Fundamental aspects of qualification of various equipment and instruments. | | |
| | | CO6 | Understand the concepts of IPR. | | |
| | Audits and Regulatory | CO1 | Understand the role and importance of auditing. | | |
| | | CO2 | Understand the methodology of auditing. | | |
| 07 | | CO3 | Understand the detail concept of the audit process. | | |
| 07 | Compliance | CO4 | Understand preparation of the auditing report. | | |
| | (MQA203T) | CO5 | Understand the check list for auditing. | | |
| | | CO6 | Now about auditing of different department. | | |
| | P'ceutical Quality Assurance Practical-II (MQA205P) | CO1 | Understand analysis of Organic Contaminant, Metallic | | |
| | | | contaminant, & antibiotic residue by HPLC, TLC &flame | | |
| | | | photometer. | | |
| | | CO2 | Understand estimation of Hydrogen Sulphide & Chlorine | | |
| | | ~~ ^ | Sulphur Di hydroxide by colorimetric method. | | |
| 08 | | CO3 | Understand Quantification of Autoclave, Hot Air Oven, | | |
| | | 004 | Dry mixer & Tablet compression machine. | | |
| | | CO4 | Understand the Validation of an analytical method for drug | | |
| | | COF | and Processing Area and Pharmaceutical Equipment. | | |
| | | CO5 | Understand checklist for Pharmaceutical Drug & pharmaceutical Drug Products. | | |
| | | C06 | | | |
| | | CO6 | Understand Case study on Application of QBD & PAT. | | |
