BY SATYA TEJA GARLAPATI

Mr. Esaila

Sinergy and Agility, how QA can drive innovation in the pharma industry

Sinergy is the interaction of the mind, body, and soul to create an **enhanced** combined energy; the resulting combined effect is greater than the sum of the individuals.

Agility or nimbleness is an ability to change the body's **position** efficiently, and requires the integration of isolated movement skills using a combination of **balance, coordination, speed, reflexes, strength** and **endurance**.

```

    graph TD
      discipline --> Innovation
      accuracy --> Innovation
      interaction --> Innovation
      consistency --> Innovation
      creativity --> Innovation
      Innovation --- Advantage[INNOVATION → COMPETITIVE ADVANTAGE]

Webinar Series Session-01

Date- 10/05/2020

Dr. Rajendra Gode College of Pharmacy, Malkapur has arranged the webinar session for B. Pharm Final yr students on cGMP. Mr. Pravin Patil, Assistant Manager (Quality Assurance), RV Healthcare, Aurangabad delivered his talk on cGMP, and its requirement as per the regulation. He guides the students regarding basic requirement of pharma industry. He also talks on the expectations of the Pharma Industry with the students, and how one has to improve the quality and competency to enter in the Pharma Industry. Students also interact enthusiastically during the question answer session. The webinar session was host by Prof. R. R. Thenge.

Basic cGMP
PREMISES, MACHINERIES AND ANALYTICAL EQUIPMENTS (AS PER GMP):

The premises and equipment must be located, designed, constructed, validated and maintained to support the intended operations. Layout, design and operation must be designed so as to minimize the risk of errors and permit effective cleaning. Adequate and safe provision of lighting, heating, ventilation, power, gases, water and drainage.

Equipment's required in OSD

- RLAF - Reverse Laminar Air Flow, control the hazardous emission of dust powder during dispensing or sampling process
- RMG: Rapid Mixing Granulator
- FBD/FP: Fluidized Bed Dryer / Fluidized Bed Processor
- VTD: for drying Vacuum Tray Dryers
- Blender: mixes the API and excipients to ensure there is a homogeneous mixture of the all ingredients. Octagonal Blender, Drum Blender, Double cone blender etc.
- Milling: Size reduction, Milling, co-milling, colloidal mill
- Sifters: Used to separate and break up clumps in dry ingredients. Vibro sifters
- Roll Compactors: Roll Compactors are also called dry granulators. These produce flakes of fine powders
